Q: Set a minimum value for a input on using jQuery I want to validate my input using jQuery. But i need to limit the user to enter only a number(not more than two decimal points or anything else. Let's say if the user's number is 1.2, then my input should be 1.23(I know how to remove number having dot) and I can not modify the source code. I am new to jQuery so sorry if the problem is trivial. Please help me. Thanks in advance. A: So, assuming we have: Then you could do:

```
$('#input[type="text"]').on('input', function() { var str = $(this).val(); if (str.match(/^[-+]?[0-9]+(\.[0-9]{1,2})?$/)) { $(this).val(str.replace(/\./g, '')); } });
```

Here, we'll bind an input handler to the input's onchange event. When it's called, we'll determine if the current value can be converted into a number, and if so, we'll strip the decimals and only allow numeric strings. More information can be found on regexr.com. If you want to only allow numbers that are not bigger than 2 decimal places, then you'll need to add a few more checks, like so:

```
$('#input[type="text"]').on('input', function() { var str = $(this).val(); if (str.match(/^[-+]?[0-9]+(\.[0-9]{1,2})?$/)) { if (str.match(/^[-+]?[0-9]+(\.[0-9]{1,2})?$/)) {
```
