HoRNet.Plugin.Bundle.Win.MacOSX.HoRNet.Plugin.Bundle.Win.MacOSX.zip
.zip,, .zip A: The answer from @JoeyDNelson is completely correct, but this is a bit too coarse for me: Try to check the OSX version using the HoRNet manual, maybe there is a fix already in the HoRNet.Plugin.Bundle.Win.MacOSX.dll. The final solution for me was to reinstall the HoRNet Plugin Bundle because I had a bad file in the plugin pack. In case that you have the same problem reinstall it. Open the HoRNet Plugin Bundle Manager, remove all HoRNet Plugin Bundles from there, go to the HoRNet Folder and extract the HoRNet Folder again. When done simply add all HoRNet Plugin Bundles from the HoRNet Plugin Bundle Manager to the HoRNet folder, after that you can install/update the HoRNet Plugin Bundle Manager. To delete the HoRNet Plugin Bundle Manager from the Control Panel go to System Preferences in the Apple menu, click the Apple logo on the top left and then click the shortcut shown below. Then uncheck the HoRNet Plugin Bundle Manager and check the other plugins which are shown in the HoRNet Plugin Bundle Manager. After you have everything working again simply remove the HoRNet Plugin Bundle Manager from the control panel: Then go to the HoRNet Folder and delete the HoRNet Folder. Afterwards add the HoRNet folder back, run the HoRNet Manager and install/update HoRNet Plugin Bundles. You can find more information about the HoRNet Plugin Bundle Manager in the manual of the HoRNet Plugin Bundle Manager in the Installing Manuals section. d4474df7b8
