Other relevant aspects are described in an earlier blog post. This section is definitively more current. Nowadays, the scale-trigger mechanism has a very low false-alarm rate. This is mainly due to the fact that it leverages some popular security and threat related information mechanisms: a) To handle potentially increasing (adversarial) traffic volume, a new scale-trigger mechanism was introduced in the latest Deep Packet (Max 10) version 3.25. This is more efficient than the one
