LIMDEP Version 9.0.rar Q: Getting console output from Parallel.For Is there any way to get the Console.WriteLine() output from a Parallel.For? So far I have this which obviously does not work: static void Main(string[] args) { Parallel.For(0, 100, i => { Console.WriteLine(i); }); } Thanks A: You can use the output stream returned by the Parallel.For method: static void Main(string[] args) { Parallel.For(0, 100, i => { using (StreamWriter sw = Console.Out) { sw.WriteLine(i); }); } You can also use Console.SetOut to define the output stream: static void Main(string[] args) { Parallel.For(0, 100, i => 2d92ce491b
