AutoCAD [2022-Latest]

AutoCAD includes functions for 2D drafting and 2D and 3D modelling, and many advanced drafting features. It also includes many powerful native commands that enable users to automate drafting tasks. AutoCAD native commands are accessed with the keyboard. Most commands start with a letter, while some commands with a number and letter are used to perform specific actions. For example, the A11 command draws the AutoCAD 11.0 legend. The A07 command displays the selection palette (useful for highlighting selected features and performing "pick" operations on selected features). These tasks are performed by other CAD software applications, or via the Internet in the form of paperless design capture and collaboration tools.
