Ghost Machine is composed of a sequence of 3 plugins: - The Bass Part: Bass Generator with 16 sequences - The Pad Part: a 16 step sequencer with 2 chanels - The Drum Part: 4 drum plugins (Kick, Clap, Snare, HiHats) each with a 4-band EQ and 4 FX Ghost Machine is the latest updates and features of my previous plugin Ghost Pad. Ghost Machine provides unique sounds with a wide selection of presets and features to help music producers create their unique sound. Ghost Machine is composed of 3 parts: a bass part, a pad part, and a drum part. Bass Part Ghost Machine's bass part is composed of 16 sequencers that are able to generate all kind of cool bass sounds: one step = one frequency. You can have your bass sequencer set to Auto + Manual or just have a specific sequence configured as it is with Ghost Machine. The presets are split between a set of presets based on 4 positions: Low, Med, Med Medium and High. 4 position is the default set of 8 presets used in Ghost Pad. Lets take a look to an example of bass part presets: - A Sample Preset based on Low: - A Sample Preset based on Med: - A Sample Preset based on Med Medium: - A Sample Preset based on High: - A Sample Preset based on Low + Auto - A Sample Preset based on Med + Auto - A Sample Preset based on Med Medium + Auto - A Sample Preset based on High + Auto - A Sample Preset based on Low + Manual - A Sample Preset based on Med + Manual - A Sample Preset based on Med Medium + Manual - A Sample Preset based on High + Manual Here you have an example of a "Low" bass sample preset: Example of "Low" bass sample preset. Ghost Machine provides you an export feature to create your own bass sample presets Ghost Machine provides you an export feature to create your own bass sample presets With Ghost Machine's bass sequencer you can use an external MIDI clock and you can customize the time of each step of your sequence. Ghost Machine's bass sequencer allows you to trigger and sequence the waveforms from an external MIDI clock PAD PART Ghost Machine's pad part is a 16 step sequencer composed of 2 chanels. The first channel is a sequencer with 16 steps (0-15) and can be set to Auto or Manual. The second channel is a LFO sequencer with 8 steps (0-7). The LFO sequencer will generate a LFO signal with a modulation rate of 0.25, 0.5 or 1.0. The plugin will let you set the modulations of the LFO channel:
