QLandkarte GT Crack Free

An open source software program dedicated to displaying the current position, routes and tracks on a variety of maps in a professional way. Get a native map, and see tracks, waypoints, and routes on your screen. Just place waypoints using a graphical interface, drag the map to a desired location, and the program automatically creates a route to the place. The program allows you to find the destination using latitude and longitude and display nearby landmarks. Intuitive user interface, and the ability to move and rotate the map display. You can also make pin-point calculations on a map display using a built-in calculator. Added, split, merge, delete and print waypoints. Add waypoints with their icon, comment, position, altitude, and download to other maps. You can show tracks, waypoints, and routes on a map, adjust route direction, and view current position, altitude and speed on a map. The program features a native map interface that lets you navigate on the map and see waypoints, tracks, routes and current position on a map display. The program allows you to find your current destination using latitude and longitude and display nearby landmarks. You can create a new map from existing geo-referenced files, TIFF image or fine tune offsets of referenced files. The program lets you add waypoints and routes and display tracks and waypoints on the map. Just move the map to a desired location, drag it to another place, and the program automatically creates a route between the two points. You can add or delete waypoints, the program also lets you view and set up GPS track data. You can also set up waypoints, tracks and routes, and view them on a map. The program lets you save, edit, and print waypoints. You can create new maps from existing geo-referenced files, TIFF image or fine tune offsets of referenced files. The program lets you add points and lines, and adjust their direction, altitude and speed. Plus, you can add a sound notification to waypoints. The program also allows you to search for points of interest, pin-point calculations, convert units, create waypoint collections, and you can edit map display options. The program lets you send and receive waypoints with a variety of options. The program lets you export waypoints to a GPX file. In addition, the program lets you export a map to a PDF file
