Tracing with the Tracing Brush The Tracing Brush is a very helpful tool in the editing of images when you want to reconstruct an image that's damaged, lacking detail, or has been created by digitally removing parts of an image. First, you trace the damage or parts you want to remove (that's why you need an image to begin with). To do this, activate the Brush tool. You can find the Brush tool on the toolbar or by choosing Tools⇒Brush. When the Brush tool is active, you can use a variety of brush options in the Options bar. (See Figure 2-1.) The first option you should check is the Method. The type of brush works best for the application, and the Soften brush method softens the edges of the image and blends areas of an image that are too close together. ****Figure 2-1:**** Use the Options bar to choose brush options. Photoshop gives you the ability to reconstruct a lost image in two ways: You can either use the default settings or you can tweak them in the Options bar. A simple way to reconstruct an image after you have traced over it is to choose Save from the File menu and select New

from the Preset drop-down menu. You can also choose New from the icon in the Layers palette. Another method is to use the Photoshop Recompose feature in the Options bar. Here's how to activate this feature: 1. Choose Edit⇒Recompose. 2. Select the tool you use to trace over the image. 3

that guided him when he had to decide whether to sell an asset. "Eric had a high-level view of the business, but all his decisions had to be approved by someone," says Demain. Demain has done more than anyone to help restore O'Loughlin's reputation. Since leaving Sears in early 2011, he has started a recycling business and cofounded a company called S.O.A.R. (Suicide Prevention for Those Affected by Recycling) that provides free lysol-like cleaners to recyclers. One day he heard O'Loughlin speak on the radio and decided to make a direct appeal to him. In the guise of an informal interview, he came right out and said, "I know you, and I know what you've been through, and I know how you feel." He continued with his usual warm, funny sales schtick and soon O'Loughlin agreed to an interview. Now, O'Loughlin is working closely with Merrian Brown, author of "Moments of Doubt: And Other Stops Along the Way" and "Sell More, Scrounge Less: Secrets for Amazing Sales." Brown is a long-time friend of O'Loughlin's who has written three books about her life. But in the last two years, she has also

become a friend to his old colleagues. Together, she and O'Loughlin are working on a new book, tentatively called "The Art of Selling: Designing Innovation that Lasts." Here's what is new about the last two years for O'Loughlin: • He's still fired up about innovation. He's famous for saying he's out to "do the impossible," which may explain why his innovation record since leaving the company is almost as good as it has ever been. His biggest innovation since leaving the business has been working with Brown to establish an educational charity called Run with Ideas. O'Loughlin is the president and director. Since 2009, O'Loughlin and Brown have been backing an engineer named Tanner Anderson, whose work created a business that reaches more than a million people a day in 100 countries through a free service called Vox. The service is similar to Google, where you type in a question and it comes up with a search suggestion. Another innovation was AisleBuyers, a
