The present invention relates to a method and apparatus for detecting abnormalities in a plant using vibration analysis, and more particularly, to a method and apparatus for detecting abnormalities in a plant using a vibration analysis system and a method for determining the state of the plant. A conventional method for detecting abnormalities in a plant includes a method using a microscope, a method using a camera, a method using a microcomputer, etc. The above-described conventional methods are effective when the plant has normal growth characteristics. However, they cannot be used when the plant has abnormal growth characteristics or when the plant is in an abnormal state. Since a plant has its own unique vibration characteristics, it
