Keymacro is a text-based macro recorder that functions as a program that records macro programs (i.e. a command that you type frequently into a program that you can then run another time you want to execute that command). iMacros Description: The iMacros scripting language allows you to automate tasks with a few lines of code, and the built-in recorder helps you to quickly record, preview, and playback the commands you've recorded. Text-To-Speech Description: TTS is a program that can convert text into spoken words. While it's not possible to get the voice to speak "speech", this program can convert simple text to spoken words. Dictation Description: Dictation is a program that converts simple text into spoken words. The service works with both the built-in voice and external voices like Google, Amazon, Microsoft, and more. A: There are several different ways to accomplish what you are trying to do. Some require a paid license, some don't. The built-in OS X functions in the Finder can convert anything to a format that Finder can use and keep it in place. This is the most flexible way to do what you are trying to do, and the only way you can do this that doesn't require 3rd party software. If your files are in a standard format (eg. MP3, AIFF, or WAV) they will have been converted to MP3. If your files are not in a standard format (eg. RAW, MP4, MOV, AVI, etc.) they will have been converted to the iTunes file format. You can check which formats your files are in by going to the file in Finder and selecting Get Info. This will bring up a dialog that looks something like this (for a video file) : If your audio files are in a format that iTunes can't use, there are several options. iTunes doesn't support FLAC (which is a lossless file format), nor does it support ALAC, LPCM, or anything else. You have a few options. Option 1 - Rip the song using iTunes If you have a copy of iTunes that is already installed on your computer, you can use that and choose File > Convert Files to MP3 (or whatever) to convert your audio files to an MP3 format. Option 2 - Convert to AIFF If you have a copy of iTunes that is already installed on 1d6a3396d6
