I am really struggling, could someone please assist? A: You need to specify the type of what your returning and not the type of the source of the data. So in your query, something like this should work `db.Views.Where(row => row.Categories == "Videos").ToList();` Just be aware that is you are calling a stored proc or using Linq-to-SQL to get the data back, you can't use Where and ToList. You have a couple of options Either replace the query with something like this `var query = db.Views.Where(row => row.Categories == "Videos"); var results = query.ToList();` Or by adding the IQueryable to the return, which would be called when Linq-to-SQL is using the stored proc. `var query = db.Views.Where(row => row.Categories == "Videos"); var results = query.ToList();` The query returns a list of ViewModel objects, so you could do a type of `var viewModels = query.ToList();` Hope this helps # emacs: -*- mode

Oh so cute. Yes the price is too expensive. Then I would suggest to try to check some of the products in local stores to see what they are offering and what is the best option for you.

BEAUTIFUL: If you like animal photography, and here is one it is - New versions: 1. Field of the Invention The present invention relates to an antenna device, particularly to an antenna device that is detachably coupled to an adapter. 2. Description of the Related Art Nowadays, many portable electronic devices, such as notebooks, e-books, PDAs, and mobile phones, are equipped with a wireless transceiver capable of wireless communication. A wireless transceiver typically includes an antenna. For electronic devices that are in a reduced or minimised enclosure, such as a portable electronic device, the integration of the antenna within the electronic device poses some challenges. For example, the integrated antenna has to be small to fit within the confined space of a

portable electronic device. However, an antenna with a small physical size typically has low gain and limited radiation efficiency. Therefore, the inventor of the present invention has proposed a detachable antenna adaptor, which may be detachably connected to an adapter and used as an antenna in a portable electronic device to resolve the aforesaid problem. Determination of trace to ultratrace amount of uranium(IV) in the presence of extremely low concentrations of uranium(VI). A practical method for determining trace amounts of uranium in the presence of the weakly acidic uranium(VI) species in aqueous systems has been developed. The method is based on the formation of uranium(IV) complexes with the use of the chelating reagent phenanthroline-2-isothiocyanate and the detection of the resulting uranium(IV) with the use of the 4-(2,4,6-trimethylphenoxy)phenolate leucoemeraldine fluoride complex (EMLF) reagent. The utility of the method is demonstrated by determining trace amounts of uranium in aqueous samples. Pavel Bure and some of the other notable players from these teams will be inducted into the Hockey Hall of Fame on the weekend of July 27th. Among the other players who have been recognized are Wayne Gretzky, Red Wings' Steve Yzerman, Mario Lemieux, Dominik Hasek, Stan Mikita 3e33713323
