X-Jreepad allows you to work with several files at the same time, within the single window. It features real time collaboration, allowing you to work on separate documents in different windows, share them with your friends, organize your tasks, and so on.

Collaboration Each document has an embedded chat window, which is always shown over other documents. While working, you can share documents with your friends using this chat window, and have them provide their suggestions and comments. You can also leave your comments in a document, and your friends will be notified of it.

Document Sharing Each document can be shared with multiple people, allowing them to work on different parts of it. You can also create a group, and assign a project to it, which will allow people to share the document with it. You can also share documents with your friends, allowing them to review or

comment on it, and so on. The document sharing feature works with the Internet, email and local network. You can also work on a separate copy of the file, while your friends are working on it as well. You can also mark files as read-only, making it easy for them to access the document without taking care of them. If you want to split a document into separate files, you can easily do it. A document can also be moved around to make it easier to navigate. The app features real time collaboration, which allows you to share documents without having to write them again. Document File Management Each document can be sorted, filtered,

and exported. You can also have a document server, which will allow sharing your documents with other users on the same network. File Formats Supported The document editor supports all kinds of files, including HTML,
