
MyLanViewer 4.8.0 (Portable) Crack |BEST|

The new version 4.8.0 adds a lot of new features such as: - ADD/UPDATE support - EXPORT options. This is a very useful feature if you want to export your database to a file, or you want to remove some data. - SELECT query help tool - CACHE database (in the Options window) - ADVANCED user-interface - ADD/UPDATE MANAGER. You can manage your database easier now, just by double clicking a table, or by double clicking a field (in the new tab -> "Add table"). - MANAGE TIMELINE (in the Options window). - MANAGE AUDIT (in the Options window). - FILTER supported in any table (in the Options window). - AUDIT as a filter by default (in the Options window). - DIRECTORIES support for folders (in the Options window). - ADD/UPDATE DATABASE. - MANAGE AUDIT. - BOOLEAN fields and sub-queries support (in the Options window). - CREATE TABLE IF NOT EXISTS option in the CREATE TABLE query (in the Options window). - CREATE TABLE AS SELECT query (in the Options window). - ADD/UPDATE in a query (in the Options window). - INNER JOIN (in the Options window). - OUTER JOIN (in the Options window). - JOIN and WHERE not supported (in the Options window). - INITIALIZER in the CREATE TABLE statement (in the Options window). - UNION support (in the Options window). - INNER, LEFT, RIGHT, FULL in the WHERE clause (in the Options window).
