Bjorn Ulvskov, FIFA Game Director: “We’re excited to showcase the most realistic player likenesses to date, while simultaneously introducing a core set of new gameplay features that best represent the world’s most popular sport. We feel extremely fortunate to be able to leverage the expertise of EA Redwood to create an experience that reflects the real world of football”. Here are some features: **FIFA Intro** The biggest and boldest introduction for the FIFA franchise. The FIFA intro is a customizable voiceover track for the intro cinematic, which can be re-recorded by gamers using a microphone and a computer microphone. The track can also be used as a built-in, in-game, UGC-ready intro. **FIFA Intro Developer Post-Mission Screen** A new Post-Mission screen that appears briefly after the end of each match. This screen is triggered by a victorious result, allowing the player the chance to check-in with his friends and hang out with his teammates on the way to the next match. **Rampage** The Rampage feature introduces a brand new experience, where players can punch, brawl, kick and tackle their way into open space to make runs for the open net. Rush the line, and outmuscle, or simply out-slug your opponent to score a goal. Rampage lets players choose from a set of rules to show off their parkour moves, including a Block move, Knock-back move, Tackle Skip move, and more! The numerical ranking will still be displayed and is also used in offline and offline career modes.
