One of the biggest things that Google Play does is it lets developers publish their apps to the platform. So, what happens when that publisher starts to go missing? I think that's what Google (and most likely Apple) have been gunning for. Yesterday, the Gmail Product Hunt team began to receive complaints that there were issues with three of their major projects. One of the features that made Gmail stand out was the ability to sign up for and manage multiple accounts (nicknamed "Gmail Multi-accounts"). The team was able to answer a question about what was going on, and reassured users that the feature would return tomorrow. Fast-forward to today (Friday, October 28th), and the entire email thread can be read here. While there's no indication of a cause for the sudden lock-down, what we do know is that some users were able to access and use their Google and Gmail accounts. However, others were not able to, and there have been reports of account resets. It's important to note that Google has not clarified to anyone that a situation like this has come to pass. However, Google has sent out an update to the Gmail Product Hunt team, and was able to answer some questions, like: We recognize that this is a frustrating and upsetting experience. Thank you for your patience. Once again, the team assured users that an update would be in place to restore access to the feature. We do not know what the update was, and while I've reached out to Google to see if they can provide me with that information, I have not yet received a response. I'd love to know what the update was. Perhaps there's more going on here that we're not aware of, and perhaps we'll hear about it from Google, but it's certainly frustrating to see this happen. Google has a history of quickly and ruthlessly cutting back and eliminating features that were once popular,

I really don't know how to translate the one sentence above. Ich bin gestern Morgen auf Hausrat. A: In a classical style of your text, you should translate it as: Jeg var mandag morgen på husråd. If you just want to say "I was yesterday at home", you can omit the preposition. Q: Expansion of a sum I came across the following

$$\sum_{n=0}^{\infty} \sum_{m=0}^{\infty} \sum_{u=0}^{\infty} \sum_{\omega=0}^{\infty} \left(n+m+u+\omega \right) \zeta \left(u+m+1 \right) \zeta \left(m+1 \right) \zeta \left(\omega+1 \right) \zeta \left(n+\omega \right) \quad (1)$$

But I'm having difficulty expanding it. I am also at a loss as to how the sum is written here at the end. Can somebody explain it to me? A: Let us first look at the first sum:

$$\sum_{n=0}^{\infty} \sum_{m=0}^{\infty} \sum_{u=0}^{\infty} \sum_{\omega=0}^{\infty} (n+m+u+\omega) \zeta(u+m+1) \zeta(m+1) \zeta(\omega+1) \zeta(n+\omega) = \sum_{n,m,u,\omega=0}^{\infty} n \zeta(u+m+1) \zeta(m+1) \zeta(\omega+1) \zeta(n$$
