Screenshot EA Sports relies on sensor data from FIFA 22 players to "capture the physicality" of players. Screenshot The motion capture data, which can be used by EA's motion capture team to adjust the game's control scheme, is generated by the most advanced version of our football AI, which now includes a sophisticated talent/strength/tactic system. With this new technology, we can now generate unparalleled human-like interactions from our players. Screenshot Learn more about FIFA 22's new motion capture technology and how it affects gameplay. 3. New Skill Set FIFA 22 introduces the FMx skill set, allowing players to learn new moves by practicing them against a human-like opponent. Using the FMx skill set, real-world techniques and tactics are recorded, allowing players to hone their skills and learn how to improve their game in the latest chapter in the soccer franchise. Screenshot FMx technology can be accessed by players in Career mode, giving them the opportunity to enhance their skill set and become a better pro. 4. Tactical Flexibility The most important addition to the new FIFA experience is FIFA 22's "FIFA Pii™," a new AI technology powered by data collected from the most prominent players in the game. This AI system now allows players to control and command their teammates, every time they play a FIFA game in Career or My Career mode. In addition, the 'FIFA Pii™' system is a fundamental component of the new Tactical Flexibility -- the ability to customize the AI behaviour of your team on the pitch, depending on the type of play. In FIFA 22, players have unprecedented control over AI, providing gameplay flexibility and game-specific control across all modes. Screenshot The Tactical Flexibility feature allows players to choose their preferred style of play, as well as designate the tactical role that they want their teammates to fulfill. Screenshot The new feature is generated using the same system that FIFA Pii™ uses to learn the specific techniques and tactics of the most successful players in the game. With the new Pii™ AI system, players can now control and challenge their teammates, not only in FIFA Pii Online, but also in Career mode, My Career mode and FIFA Ultimate Team. 5. The FIFA Guide FIFA 22 has a new digital magazine, the FIFA Guide. This new digital publication features all the FIFA-relevant info

It is no exaggeration to say that millions of players and fans from more than 200 countries around the globe play FIFA on a daily basis. It has been achieved through a combination of great gameplay and in-depth community involvement, in addition to continuous development. How is FIFA so realistic? Since 2013, FIFA has been based on a new generation of sports data and video captured in-studio, in stadiums and in game environments. Plus, we have also introduced a way to detect different types of goalkeepers. This is something that had never been done before in a top-selling videogame. This is one example of how we are giving players a more immersive experience in soccer as they live out their fantasy while playing. What is FIFA Ultimate Team? FUT is a way for people to get extremely creative when building their dream squad. This is achieved by bringing back the most important components of FIFA's gameplay - the free-flowing passing, dribbling, shooting and goal scoring - as well as some of the game's many other features. FUT allows fans to essentially "build their dreams," whether you're a seasoned player or a newbie. What is FIFA Mobile?
